Dues may be submitted at meetings or mailed to: LEHHNA c/o Diane Martens 229 E. Amelia St. Orlando, FL 32801-1303

GARDEN TOUR IS COMING ...

The Private Gardens of Historic Orlando featuring Lake Eola Heights Historic Neighborhood is tentatively on target for Sunday, April 19, 2015. We already have our sites set on some really great gardens. There are only 10 months to go, so be thinking about volunteering your garden, helping us hunt down more gardens and even volunteering to work on the garden committee.

PET WASTE: PICK UP AFTER YOUR POOCH

It is amazing to witness the quantity of pet waste that is not picked up along the streets of Lake Eola Heights. Are there really that many uncaring or ignorant residents? They probably just don't know, so here it is:

It's the Law

Orlando City code requires you to pick up after your pet. It's a nuisance, and leads to water pollution no matter where you live.

Orange County Ordinance sec. 5-50. B (9) Fail to remove excreta from animal owner's property, resulting in offensive odors. (first offense \$110 fine) C (7) Fail to remove any excreta deposited upon public property or another person's private property by any animal within the care, custody, ownership, or control of such person. (first offense \$84 fine)

Water Pollution

Un-scooped poop washes into storm drains, which drain directly to local lakes and water bodies, harming human health, wildlife and the environment.

Reduced Oxygen Levels

Decomposition of pet waste demands a high level of oxygen from water, reducing the amount of dissolved oxygen available to plants and animals - resulting in fish kills.

Algae Blooms

Pet waste adds excess nutrients like those found in cow manure to lakes - resulting in algae bloom (a stagnant blanket of green).

Take a bag with you on walks to pick up after your pet. Dispose of the waste in the toilet or trash.

(Above taken from the City of Orlando website)

You may have noticed that Mr. Bob Fish from the Orlando Clean Team has provided Lake Eola Heights with new Dogi-Pot pet refuse collection containers. These are much studier powder coated metal containers with easy-open lids. Also, the former stronger bags have reappeared. There is a station on the corner of Ridgewood Street and Summerlin Avenue, one on the corner of Livingston Street and Broadway Avenue, and one on the corner of Cathcart Avenue and Amelia Street across from the Handy Pantry. This makes it easy to be a responsible pet owner!!
