

An Online Library of Lepidoptera Resources.

(continually updated)

Compiled by Harry Pavulaan

Last updated: 3 February 2006 (7am)

NOTE:

The following bibliography is intended as a convenient service to provide “one-stop shopping” for countless links to “open-access” literature available through many websites on the Internet. In compliance with copyright laws, users must always be aware that these links take you to the originating URLs, which are hosted by many individual websites of a broad variety and scope, and are technically NOT “hosted” by The International Lepidoptera Survey. We just point you to the exact links without having to go through multiple home pages, extensive site searches, etc. These papers are generally copyrighted by the original publishers and may not be copied and reposted on any website. You may download, store, display and print them for your own personal use, but may wish to refer to each paper’s hosting site or homepage for any additional restrictions. Commercial use is prohibited. All publications should be cited as listed.

All of the cited publications are accessible for free in either downloadable PDF format or by way of an HTML link. All links are in PDF format unless indicated as “HTML version”. HTML links open directly from the web, are considerably faster to access than PDF files, and once saved, the text is editable. In cases where multiple links to the same paper are provided, this is to insure continued accessibility from multiple sources in the event that a link is disconnected by an owner. Adobe Acrobat reader is recommended for downloading and opening PDF files, and keywords can be used to search for topics of interest. If a WORD version of this reference list is needed, please inquire with the compiler at: pavulaan@aol.com

BIBLIOGRAPHY:

Abbas, M., M. A. Rafi, M. Inayatullah, M. R. Khan and H. Pavulaan. 2002. **Taxonomy and distribution of butterflies (Papilionoidea) of the Skardu region, Pakistan.** The Taxonomic Report 3(9): 1-15.
