

Neighborhood Disaster Preparedness Order Form for 55-gallon Water Barrels

(orders due by Thursday, March 20, 2008)

Halcyon Neighborhood Association (HNA) is coordinating a joint neighborhood order of water barrels to enable households to easily store 55 gallons of water for disaster preparedness. In the event of a major quake on the Hayward Fault, it will take time for government help to reach us. Even if the main water supply through the Caldecott Tunnel area escapes damage, EBMUD predicts at least 5,000 breaks in its system! And when government trucks finally arrive with water, there will be long lines and frustrating waits to get limited supplies. Water is essential for survival! Please safeguard yourself and your family by getting prepared. The recommendation is to store a MINIMUM of 1 gallon per person per day (2 gallons per person per day preferable, to allow for cleaning and other needs), to last for at least 5 to 14 days.

By ordering at least 70 55-gallon water barrels at a time, we can obtain a substantial discount of approximately 35%. LeConte Neighborhood Association and Willard Neighborhood Association are joining with HNA so we can place this minimum order and get more water stored in our South Berkeley neighborhoods! Other neighborhood groups may also choose to participate. To order a 55-gallon blue plastic water barrel and manual pump for disaster prep water storage (with bung wrench optional but recommended to make opening easier), please fill out the order form below. Orders MUST be received by Thursday, March 20 (no exceptions); the price includes shipping to a central Berkeley location. Volunteers with trucks will be needed to make deliveries to the various neighborhoods, and additional volunteers will be needed to deliver the barrels to individual households within each neighborhood. If your neighborhood isn't participating as a group, you might need to pick up your own barrel. (This is an all-volunteer effort; prices reflect actual costs.)
