

# Welcome Baby @ Home

We want to welcome you and your baby to the world of early learning! Children are constantly learning, right from birth. As a parent, you have the greatest opportunity right now to influence your child's development and success throughout life.

Learn more about how your baby is growing and how you can best support his or her early learning. We offer a new project that will:

- Deliver a gift for you and your baby.
- Provide information about what you can do now to promote healthy brain development. Research indicates that the greatest impact you can have on your child's brain development occurs when he or she is 0-9 months old.
- Provide a home visit with an early childhood specialist who will tailor the visit to meet you and your baby's needs. One-three visits are offered.
- Offer screening of your baby's developmental progress.
- Help you find resources in your neighborhood.

This new project is brought to you by the SELF (Support for Early Learning and Families) collaboration and funded by the Clark County Early Learning Fund

Please call today to schedule a visit. Call (360) 695-1325 ext. 4204
