

Neighbor Reports

Many residents on the south side of campus have been disturbed by loud bands of young people roaming the streets, late night noise from boisterous parties and trash accumulating at the curb or in front of houses. We see this activity in our daily lives here in the Willard neighborhood.

The staff at the University is dedicated to addressing these issues but they need to be kept informed. Unless we collectively keep the University informed they will not know the extent of the problems we are experiencing and will not have the data to attempt to make changes.

The following reporting format, agreed to by the University, is a step in opening the lines of communication and collecting data. (I know this has been done many times before but Linda Williams is the new Dean in charge of Student Affairs and has a fresh perspective). We want to support UC's efforts to make our neighborhood a better place to live.

Lynn Halperin will keep a log of the problems reported and submit the information every other week to UC. To enter a problem in the data base, you need to email Lynn the following:

Date

Time

Location

Nature of the disturbance

Action taken (Police called, spoke to students, called the land lord)

If police involved what, to your knowledge, was the action taken
(2nd response)

Any other information that might be helpful

If you have any questions, comments or concerns about this reporting system please feel free to email me.
