

Construction begins on the West 36th Streetscape Project.

The City Council awarded the construction contract on Monday, August 17 for the project. Construction is mobilizing and will begin this week. Weekly construction updates are provided on the City website at http://www.stlouispark.org/construction_updates.htm

The work will last 2-3 months. During construction, the outside lanes of 36th Street may be closed to install new curb, driveway aprons, and for the general safety of workers. Access to businesses will remain open throughout the project.

Questions can be directed to City Engineer Scott Brink at sbrink@stlouispark.org or 952-924-2687.
