

The Association Board has recently filed for a permit to destroy and remove the Canada Geese nests and eggs.

Hopefully this will help our community rid the nuisance of these irritating and overwhelming pests.

Board members will be collectively scouring the grounds to locate these nests. The nests and eggs will be marked to help keep track of these because it's mandatory that a report be filed on how many nests/eggs are removed and destroyed.

Please help us with this problem by reporting any nests or eggs that you see to the following email:

[sutterscove@gmail.com](mailto:sutterscove@gmail.com) or contact a board member.

Thank you for your help and hopefully the grounds will have fewer Canada Geese in the future.
