

SOUTH PARK SLOPE COMMUNITY GROUP

A new building is going in next door?

Know Your Rights!

HELPFUL CONTACTS:

www.southsouthslope.com

Our website is a resource for the South Park Slope and Greenwood Heights community, with up-to-date information on rezoning issues and endangered sites in our neighborhood, news articles, resource and contact information and more.

3-1-1

Calling 3-1-1 is the most expedient way to register a complaint with our city government about quality of life issues. If you observe careless demolition or construction, **call 3-1-1 immediately** (day or night, weekday or weekend). When you are connected to an operator, tell him or her that you want to file a complaint with the Department of Buildings. (Depending on the complaint, you may be transferred to the Department of Environmental Protection.) Describe what you have observed and be as clear and concise as possible, for example, “work is being done after hours without a special permit,” “there are unsafe worksite conditions” (e.g., protective shed fallen over, debris on sidewalk). **You don’t have to give your name (unless you want to).**

Email the SouthSouthSlope Newsgroup (south_south_slope@yahoogroups.com) with the address of the site, the complaint number you were given and a brief description of what’s going on. (If you’re not on our list, you can join here: http://groups.yahoo.com/group/south_south_slope/)

Community Board 7

If you feel your situation is of larger concern, alert our Community Board, who will register your complaint with 3-1-1 and, if warranted, higher government officials. Call 718-854-0003 and speak with District Manager Jeremy Laufer. Email: communityboard7@yahoo.com

NYC government offices:

KNOW THE LAW:

Demolition/Construction:

1. No demolition of a building or structure can commence until **a permit** has been obtained from the Department Of Buildings.
2. Before a contractor can be approved for a demolition permit, he/she must (among other things):
 - >Verify that **five days' prior notification was given to the adjoining property owners**. (If you have not been notified and demolition commences on a property adjoining yours, call 3-1-1 and the Community Board!)
 - >Verify that notification was given to the community board.
 - >Verify that gas, electric, sewer and water have been cut off.
3. Prior to commencement of demolition, the contractor must enclose premises, **erect a sidewalk shed** if required and remove all glass. For all buildings 15 feet in height or higher, **a sign** stating the contractors' name, address and phone number must be posted.
4. **Allowable work hours** are from 7am to 6pm, Monday through Friday. Work performed after 6pm at night or on weekends requires a special (for that day only) permit and **must be posted on the worksite**. If work is being done outside of allowable work hours and there is no permit posted, call 311!
5. **Parking demolition/construction equipment** (excavator, bulldozer, building material, etc.) on street requires a special permit from the Dept. of Transportation.

THINGS TO DO IF A PROPERTY ADJOINING YOURS IS GOING TO BE DEVELOPED:

1. **Photograph your house and property** before demolition and construction begins to document that there are no pre-existing cracks, structural damage, etc. Include photos of property lines, foundation, cellar, structural walls, roof, stairs, fences, backyard, garden, etc.—anywhere there is potential of damage from demo and building equipment.
2. **Contact your insurance company**. Contacting your insurance company before work begins may be your best line of defense if claims, action or litigation become necessary.
3. **Don't sign any documents** given to you from a developer or contractor without first contacting your lawyer or one of the attorneys working with our community group. Be on the lookout for affidavits of Objection of Consent concerning Board of Standards and Appeals applications, as well as items such as selling "air rights," allowing construction fences on your property, use of your electric and water, etc.
4. **Have a survey of your property done**. While you may have received a survey map when you purchased your home, you may need a more detailed and up-to-date survey. This will cost a few hundred dollars, but it may be worth its weight in gold should a property line dispute erupt (i.e. the developer wants to build right up to your house and you believe you own several inches or feet on that side).
5. **Talk to your neighbors**. They may have information you don't about the property. Try to separate facts from "the rumor mill." We're all in this together; pooling resources is the best way to stay informed and protect our neighborhood.
