

Greg Lee KI6GIG/ HS0ZHM GERC International Member

On behalf of the Glendora Emergency Response Communications group of ham radio operators I wish to express our thanks and appreciation for the ongoing communications and exchange of ideas with Greg Lee, a colleague of mine at Pasadena City College where he was a well respected Professor of Geography for many years. Greg recently participated with us via EchoLink at the Boy Scout Centennial Jamboree and he will be QSO-ing with us on Field Day this June, and the JOTA in October. Greg retired and moved to northern Thailand a few years ago to follow his dream of a self-sufficient and environmentally conscious rural life style. Greg lives on a farm owned by his wife's family and is very happy living out his retirement there. Always an active and organized planner, Greg has become somewhat of the local expert on Emergency Communications. Recently he sent me his QSL card and has even offered to make a customized QSL card for GERC. Greg will be contributing articles and ideas on ham radio to our newly reorganized website from time to time. We welcome Greg as our **GERC Auxiliary International Emergency Station "GERC-AI, HS0ZHM" !**
