

# ***Each Day we are Being Denied our Rights as a Government Who We did not Vote on Controls our Money and Our Homes Value without our say in the Matter***

Who are we to question a supreme authority such as our management company and board of directors?

Why should we care if we are provided with accurate information pertaining to our monies used and when it is used?

Who decides when the money is used as the budget is setup as a draining account of used in each categorize monies.

Has does the monies move so quickly month after to month as contractors get large cash awards?

How can the insurance go down 56K when the aluminum wiring which was the reason for the initial increase has not been resolved?

Why would the Board of Directors and TMMC Abort the Annual Meeting?

When will this community come together to Gain a handle on things by a Class action Lawsuit against the TMMC Group and Board for director for this handling of our monies and the depreciation of this community.

Why should we worry about our future when the value of our homes has been decreased to a point of no return?
