

Dear Sharon,

.

You folks have some nerve putting out this budget and not reading it. Only someone who has never even looked at this junk would be asking such a question. Shame on you folks for letting our budget get so backwards.

If I have to tell you the problems then you should supply answers;

First off look at the budget Attachments. Then look at the month of December... do you see anything missing? Do the zero's mean anything? Where did the Income of the Condo sale go? Why is it missing? Where is the Loss of Condo sale in the Year end Budget.

Why didnt the Towhome and Condo Maintenance pay, why is it zero...I see your Accountables Receivable is off the chart at almost a Million Dollars.

Look.... you folks do this every year and hide this stuff. You give us a budget till October of the current year that means nothing. You need to give us a whole year and you need to look at each and every category and see numbers missing, and numbers wrong!

Someone who cares sent me this because they knew I would look at it. This is just another example of sheep being led into a field with wool over there eyes.

You folks need to be accountable with our monies NOW!

No wonder some people don't pay there dues, maybe if you showed it was being reported correctly you would get some creditability. Right now your creditability is null an void!

Look I dont write the Budget, I am a homeowner and as one I have a brain to look at this stuff.

Do you?
