

Kerry,

This shows that it's not just me getting this information. Its the whole community and your a part of it. Instead of worrying about this, how about worrying more about where your money went and how great our accounting process is working for all of us owners.

Have you even noticed the errors I have pointed out? I belive out of everything happening here at Highline Meadows, getting our financials correct, is at the top of the peak. I should not find these errors and they should not allow this to happen.

Do you think this will ever change? Or do we always present the budget as if a bunch of monkeys without a brain wrote it on the back of a cracker jack box?

You decide.
