

Long Beach

Civic Center Project

The Long Beach Civic Center Project

The Long Beach Civic Center Project involves the financing, design, construction, operations and maintenance of a new City Hall, Main Library and a revitalized Lincoln Park. The Project will also incorporate a permanent headquarters building for the Port of Long Beach and private development components.

Now that the City Council has selected the PlenaryEdgemoor Civic Partners (PECP) team to develop this important project, the next stage of this process involves refining the proposed plan. In order to inform the general public about current plans and to solicit feedback, the PECP team in coordination with the City, will hold a series of community meetings in each of the Council Districts over the next few months. The City of Long Beach invites the community to come learn more about the project and participate in shaping the future of this great city.
