

## **UPDATE - VERANDAS 9/17/18**

- 1 Elevator is running. 1 is not.
- Power is on.
- None of the pools are available for swimming. This will take several days because the staff's attention is on drying out the units.
- Some units were wet and we had water extraction start immediately yesterday, Sunday, September 16<sup>th</sup> with Full Steam Ahead. We called this company immediately to be on the top of their response list. Full Steam Ahead is still there today working. **Owners will be individually billed for the water extraction cost.**
- An email blast was sent to the Verandas homeowners which contained a list of the damp/wet units.
