

HOA puts homeowners in danger by not pulling permits

Building 190 HLM

One of our reporters snapped this photo of the porches of Building 190. It is a stop work order from the City of Centennial.

Apparently the Board of Directors and ACM decided to go under the radar of the city which requires that the correct Permits be pulled. This puts the whole community at risk and is a safety issue.

Not only did they not pull permits for the Porches they pulled the incorrect permit for the Lightening in building 100,50 and 140 along with one set of townhome buildings.

When the city of Centennial was contacted they said the incorrect permits were pulled for the Lighting project which resulted in a Stop Work Order to be issued. No one ever approved of what they are doing and it appears that building 50 light is moving.

As far as the Porches the Board and Management company should have known that permits had to be pulled for the porches which is a direct reflection of their inability to perform their job correctly.
