## PROJECT MAP

## Planned Project Improvements

## Artesia Sante Fe Bridge Project

The City of Compton owns the Artesia Bridge and is the lead for the reconstruction project. The City of Compton has been awarded a \$12,000,000 appropriation from the State of California to repair the bridge, which was made possible through a bill sponsored by Senator Steve Bradford. Caltrans is the designated funding administrator for the appropriation and is currently finalizing approvals for the funding agreement between the State of California and the City of Compton.

With respect to status of the bridge Span 10 replacement, the City is working with a structural engineering consultant to design the replacement for the damaged bridge span. This effort is anticipated to be completed by April 2023. The completed design will include construction bid documents, as well as a detailed construction schedule, which will be provided with the next status update. After the design is completed, the construction bid specifications will be advertised, bids received and evaluated, and a recommendation for award made. This process is expected to take approximately three months, putting a start of construction timeline around July/August 2023. Based on preliminary projections, reconstruction should be complete, and the bridge opened, by Spring 2024. This date will be updated when the design has been completed.
