

# Quincy Hill Window Replacement

January 1, 2024

The original windows are no longer available, but very similar windows **are** available. When looking for replacement windows, be sure to look carefully at the existing windows in your unit. For example, new windows should have pane separators that look like the pane separators in your existing windows. What the pane separators are made of, for example vinyl, is up to you. The association does not have a favorite or required brand.

The only requirement of the Quincy Hill Townhouse Association is that the new windows match the look of the old windows as closely as possible.
