

WE NEED DEDICATED STAKEHOLDERS TO HELP PLANT TREES ON MOTOR!!

Are you interested in replacing the existing Bottle Brush trees on Motor Avenue for little to no cost? Well, we can if we show our commitment by learning how to plant and lead others in planting trees.

Join other MAIA members and become a “Citizen Forester” through an exciting half-day training hosted by TreePeople.

At “Citizen Forester Training” experts in tree planting and maintenance will pass on their knowledge to us and other community members who are dedicated to projects just like ours on Motor.

Once Motor Avenue has 3-4 people trained in tree care and community leadership, TreePeople will DONATE trees to our street to help us on our way to becoming more pedestrian friendly and interesting to visit.

To learn more, please contact Krista at infomail@motorassociation.org

Think of the places that you most like to visit, shop and walk... what do they all have in common? Most likely it is a multitude of characteristics, one of which are healthy trees. Culver City, Santa Monica, Larchmont Village and other communities in Los Angeles all have interesting streets to visit and each of them have put resources into planting and maintaining a beautiful streetscape.

The Motor Avenue Improvement Association has a goal to bring more pedestrian vitality to Motor. Growth and new development is inevitable, so let's not sit back and let it happen to us without input. Let's guide it in a direction that will improve our quality of life on Motor Avenue. One way to show our commitment to positive change is planting trees.
