Gayle King on Driving More Efficiently

•Observe the Speed Limit!

Speeding can lower your gas mileage.

•Lighten Up!

Avoid keeping unnecessary items in your car. An extra 100 lbs. could reduce your MPG by up to 2%.

•Avoid Excessive Idling!

Cars with larger engines typically waste more gas at idle than do cars with smaller engines.

•Use Cruise Control!

Using cruise control on the highway helps you maintain a constant speed and, in most cases, will help you save gas.

•Use Overdrive Gears!

Using overdrive causes your car's engine speed to decrease. This saves gas and reduces engine wear.

Dainty '08...

...was a hit! By 145 that participated along with approximately 1000 attending - what a year! The longest hit was Tony Lindauer Property Valuation Adm @ 103'. The shortest distance was hit by Michael Hanks @ 3', who also hopped 103' on one foot. A great time was had by all. For all of us that turn 45 this year, next year will be *your* turn to break the record of 145' 6" held by Gene Klein since 1980.
