

## Lost Pet Notice for my Black Domestic Short-Hair Neutered Male Cat

Posted by Jack Denur of 5045 Royal Lane; Dallas, Texas 75229-4310

My domestic short-hair cat, Backyard Blackie Boo Boo Boo (short name Blackie), is missing. I last saw him at about 4:30 PM on Monday, December 11, 2017, on the patio at the back of my home at 5045 Royal Lane at the NW corner of Royal Lane and Inwood Road. He is completely black with no distinguishing markings except for his right ear being cropped to indicate that he was neutered at the Preston Royal Animal Clinic. He is current on all vaccinations (last give on November 8, 2017), also provided by the Preston Royal Animal Clinic. He has no collar but he has a microchip. His microchip number is 981020007264226. He is about 5 1/2 years old. He was in good health when I last saw him at about 4:30 PM on Monday, December 11, 2017. On November 8, 2017, when Preston Royal Animal Clinic professionals weighed him, he weighed 13 pounds. If you saw my cat and/or have any information about him, please contact me at (214)675-6599, jackdenur@yahoo.com, and/or jackdenur@my.unt.edu. Thank you very much. Hopefully he did not venture beyond Russwood Acres, but, just in case, I chose the default Surrounding Neighborhoods option under Discussions.
