

Stay up to date with a map and rankings of 2020 Census self-response rates from across the United States. Start here.

United States Census 2020

52.4% of Households Have Responded

The country has reached an important milestone in the 2020 Census. More than half of all of the households in the country have responded – that's 77,500,000 households so far!

It has never been easier to respond to the census on your own, whether online at 2020census.gov, over the phone, or by mail.

2020 Census: Your Response Matters

Invitations to respond to the 2020 Census were delivered last month. About 64 million households across the nation were recently sent a paper questionnaire and we're sending reminder postcards next week.

Did you know? You can respond online in one of 13 languages and find assistance in many more.

About the 2020 Census

The U.S. Constitution mandates a census of the population every 10 years. The 2020 Census will count everyone who lives in the U.S. as of April 1, 2020. Census statistics help determine the number of seats each state holds in the U.S. House of Representatives and how billions of dollars in federal funds will be allocated by state, local, and federal lawmakers every year for the next 10 years.
