

DANBURY NEIGHBOR

issue 1 | june 2020

A summer like no other

Regrettably, our neighborhood pool will not open this season.

On May 27, St. Louis County shared its requirements for public pools to operate legally during the pandemic (our pool is considered a public pool). The rules included requiring an attendant at the pool at all times to ensure cleaning and social distancing guidelines were being observed and masks were worn by those not in the water. We would also be required to monitor and test the chemicals in the water every two hours while open and prior to opening each day.

The Danbury Pool Committee and Danbury Trustees deemed these and the other requirements too difficult to enforce. Regardless of our desire and enthusiasm to open the pool, the liability

present in this circumstance is simply too great for our neighborhood to assume. This situation does give us an opportunity to re-surface the pool and/or consider improvements to the lake with this season's pool fund. More on that to come.

If you are interested in joining the 2021 Pool Committee, send an email to ElizabethDavis.Work@gmail.com.

The annual Danbury Trustees meeting has been postponed due to the County's COVID-19 regulations. The City of Ballwin will not currently allow more than 10 people in the Municipal Court (where we meet). Signs will be placed at the neighborhood entrances announcing the date and time when we are able to schedule the meeting.

Hello, you!

You are receiving this newsletter because you are a resident of the Danbury Subdivision.

Do you have news to share? Drop a letter under the welcome mat at 207 Spooners Mill Drive or send an email to ElizabethDavis.Work@gmail.com

Danbury Trustees

Our current trustees, Brett McSparin, Christine Watters and Eva O'Donnell are retiring from their posts.

Send an email to danburytrustees@gmail.com if you are interested in serving as a trustee.

Neighborhood Clean-Up Day

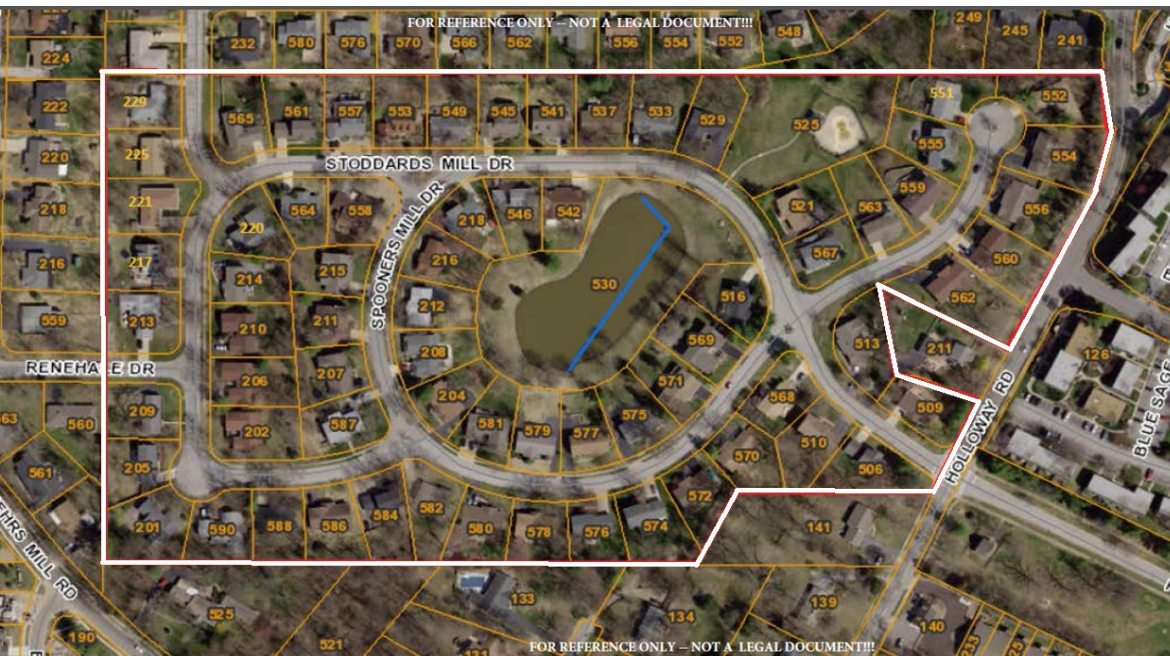

Join your neighbors on Saturday, June 6 to help beautify the common areas.

Yard of the Month program

Mowing and mulching, weeding and watering, planting and pruning. There's a lot of work that goes into a beautiful yard! Thanks to The Char Esparza-Burr Team at Core Realty, all that hard work won't go unnoticed.

One winner will be selected June through September. The winner will receive a \$20 gift card to Lowe's, have a photo of their yard posted on the Danbury Facebook page, in this newsletter, and submitted to West Newsmagazine for publication, and receive a sign to put in their yard telling everyone that they have the Yard of the Month.

Nominate your neighbor by submitting their address to danburytrustees@gmail.com or by leaving a note with their address under the welcome mat at 207 Spooners Mill Drive.

Do you know our neighborhood's boundaries?

The homes inside the oddly-shaped white box are your Danbury neighbors.

Be sure to wave the next time you drive or walk by these homes.

Looking to give the lake a makeover

Our lake has a purpose: to capture rainwater (aka, stormwater runoff) and store it, at least temporarily. Runoff accumulates pollutants from streets, roof-tops and yards, eventually reaching the lake where the pollutants settle. The lake suffers negative results of the contaminants: poorer water quality, reduced aesthetics, and decreased habitat value. Unfortunately, these problems can be costly to remedy.

Recently, an official at the Missouri Department of Natural Resources provided some suggestions on how to improve the quality of our lake. The options are being evaluated and will be discussed when homeowners and trustees are able to meet again/when COVID-19 restrictions are lifted.
